

ELEVEN TO TEN – PCB artwork, component overlays and components list

Here is the supplementary material for our feature on converting your CB transceiver to the 10m amateur band which appeared in the June issue of Ham Radio Today.

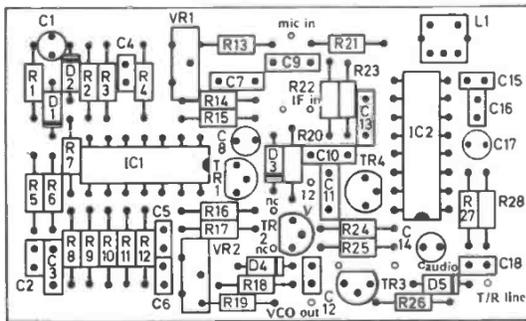

The PCB modules shown here enable the construction of an EPROM programming board and a combined FM modulator and discriminator board.

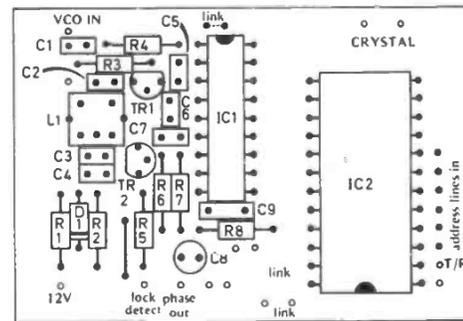

The PCB layout for the FM modulator/discriminator board.

The PCB layout for the EPROM programming board.

Modulator/discriminator overlay
